

# RIDDHI SURESH JOSHI

+91 9022199991 | riddhijoshi5900@gmail.com | Mumbai, India  
github.com/riddhijoshi19 | Portfolio | linkedin.com/in/riddhijoshi19

Final-year AI & Data Science undergraduate (CGPA 9.5/10) focused on LLMs, RAG systems, NLP, and AI applications. Experienced in building end-to-end AI solutions using Python, FastAPI, PyTorch, and vector databases.

## ACADEMIC QUALIFICATIONS

### Thakur College of Engineering and Technology

Bachelor of Technology in Artificial Intelligence and Data Science | CGPA: 9.5/10

Mumbai, India

Nov 2022 – May 2026

## TECHNICAL SKILLS

**Languages:** Java, Python, SQL

**AI/ML:** PyTorch, Transformers, Hugging Face, Scikit-Learn, NLP, RAG, Vector Search, Embeddings

**Framewords and APIs:** FastAPI, Flask, REST APIs, Spring Boot

**Databases:** MySQL, PostgreSQL

**Tools:** Git, GitHub, Docker, Google Cloud Run, Google Cloud Build

## INTERNSHIPS

### Java Full Stack Developer Intern

Capgemini

February 2026 – April 2026

Mumbai, India

- Built REST APIs and backend modules using Java, Spring Boot, SQL, and React.
- Implemented CRUD workflows, passenger management, and authentication features.
- Collaborated in Agile/Scrum environment using Git-based development workflows.

### AI Intern

TCET Open Source

June 2023 – August 2023

Mumbai, India

- Developed an NLP-based feature extraction module for an automated resume screening system, improving classification accuracy by 30%.
- Built a semantic matching pipeline using Python and Scikit-learn to rank candidates based on resume-job relevance.
- Improved OCR document parsing reliability to 95% across diverse resume formats.

## PROJECTS

### AI Research Assistant | Python, FastAPI, PostgreSQL, Qdrant/pgvector, Sentence Transformers

2026

- Architected a multi-document AI Research Assistant capable of semantic search, source comparison, claim verification, and citation-backed question answering over unstructured documents.
- Implemented a retrieval pipeline using chunking, embedding generation, vector search, and reranking to improve retrieval relevance and reduce hallucinations in generated responses.
- Built evaluation and observability workflows for RAG systems, tracking retrieval quality, answer faithfulness, and system performance through automated metrics and tracing.

### MiniGPT From Scratch | PyTorch, Python, Transformers, NLP, Neural Networks

2026

- Built a GPT-style Transformer from scratch in PyTorch, implementing tokenization, embeddings, masked self-attention, multi-head attention, and transformer blocks.
- Developed an end-to-end language model training pipeline using next-token prediction, cross-entropy loss, and AdamW optimization for autoregressive text generation.
- Implemented attention mechanisms, QKV projections, causal masking, and backpropagation from scratch in PyTorch.

## LEADERSHIP

### Professional Development Director

Rotaract Club of TCET

July 2023 – June 2025

Mumbai, India

- Led 10+ resume, interview, and career development workshops for 200+ students.
- Directed an 8-member team and increased event participation by 40% through cross-club initiatives.
